

DSTA SCHOLARSHIP

With the DSTA Scholarship, you are set to realise your fullest potential with a fulfilling and meaningful career at the forefront of science and technology. You will be entrusted to create the future of our national defence and security, and grow in a collaborative and dynamic environment where innovation thrives.

DEFENCE SCIENCE AND TECHNOLOGY AGENCY (DSTA)

DSTA develops leading-edge technological and engineering solutions for the defence and security of Singapore. Our diverse portfolio includes military platforms, weapons, sensors, networked systems, data analytics, the Internet of Things, cybersecurity, IT and building and infrastructure. The multi-disciplinary nature of our work will give you many opportunities to innovate and push the boundaries of Science and Technology.

How Chang Hong
DSTA Scholar
Senior Engineer
National Engineering, DSTA

Serving National Service showed me how technology is critical for our nation's defence and the DSTA Scholarship provided me the opportunities to make a difference. I am now working on the SAFTI City project – a one-stop facility that makes use of simulation and gamification to provide servicemen with an engaging and holistic training experience. I get to work on emerging technologies through hackathons and bottom-up innovation projects that are challenging and exciting. Working in a strong culture of learning and sharing motivates me to explore new ways of exploiting technology to enhance training for our soldiers.
